- More than 100 nutritional companies - available
- Remote scan via web connection
- Ability to author protocols / biosurveys
- Leading biocommunication technology
- Customizable platform
- Access comprehensive stimuli library

# Elite 5.0

The Elite 5.0 is our flagship product with the most advanced software. It includes the full ZYTO biocommunication toolkit. The Elite allows you to access libraries containing products from more than 100 nutraceutical companies, and the ability to add items to your own personal library. With the Elite, you'll have access to an extensive library containing homeopathy, chemicals, heavy metals, nosodes, sarcodes, environmental antigens and more. Each library item is in the form of what's called a VSI (Virtual Stimulus Item). These VSIs are used in protocols called biosurveys and with the Elite you can organize and include them on-the-fly during a scan, or you can create and save biosurveys ahead of time. This will save you time and give you the ability to hand off the scanning process to an assistant. You can even share biosurveys with other practitioners.

Call today and talk with one of our sales representatives. They'll be happy to schedule an online demonstration for you and your staff.

## Training, Support and Service:

ZYTO is the Global Leader in Biocommunication and provides support and training for thousands of healthcare practitioners worldwide in many languages. Our customer service/support department is the best in the industry offering practitioners assistance during regular and after hours, 7 days a week.

ZYTO provides extensive training tools to help you be successful in your practice. At ZYTOinstitute.com you can watch training videos and view archived webinars online. ZYTO also offers hands-on-training events throughout the United States. All of this is included in your low monthly subscription.

## Ongoing Product Updates:

ZYTO's development team includes highly experienced individuals dedicated to bringing you the most advanced technology in biocommunication. ZYTO continues to make significant

advancements in the field of biocommunication, and with ZYTO's subscription model, you can keep up to date with the latest software releases at no additional charge.

## Testimonials:

"ZYTO bio-technology creates a better informed patient, and affords greater compliance, better clinical results, and patient satisfaction. This tool leads to greater patient retention, and referral of family, friends, and neighbors while adding yet another revenue center to the practice through scans, and added dispensary."

— Dr. L. N. Meltz

"ZYTO Technology has saved me time, money and has improved my effectiveness with my patients." — Dr. B. Shelton
