- Increase nutritional products sales
(30% in the first month - average sales growth)
- Increase new client referrals
- Validate / support other modalities
- Re-activate clients
- Globally expand your practice
- Provide effective individualized scan and report
- Create new revenue streams

ZYTO technology provides the ultimate decision support tool for healthcare professionals.

Key Features of the Select 5.0

- Leading biocommunication technology
- Basic to comprehensive scan ranging from 7 - 45 min.
- Remote scan via web connection
- More than 100 nutritional companies available
- Personalized nutritional report
- Informative graphs and charts
- Access to industry leaders pre-built protocols /biosurveys

Select 5.0

The Select runs protocols that are prebuilt; they're called biosurveys. Biosurveys use library items called VSIs (Virtual Stimulus Items) to stimulate the body and the Select records the body's response. A biosurvey is a pre-built sequence of stimulus and response involving a few, or a lot of VSIs. The purpose of a biosurvey is to gather information from/about your client. That information is then included in your decision making on behalf of your client.

The Select is versatile because it can run any biosurvey you put in it. This means the Select can go through any scanning sequence and it can include any product or any non-product VSI that is included in the biosurvey.

Training, Support and Service:

ZYTO is the Global Leader in Biocommunication and provides support and training for thousands of healthcare practitioners worldwide in many languages. Our customer service/support department is the best in the industry offering practitioners assistance during regular and after hours, 7 days a week.

ZYTO provides extensive training tools to help you be successful in your practice. At ZYTOinstitute.com you can watch training videos and view archived webinars online. ZYTO also offers hands-on-training events throughout the United States. All of this is included in your low monthly subscription.

Ongoing Product Updates:

ZYTO's development team includes highly experienced individuals dedicated to bringing you the most advanced technology in

biocommunication. ZYTO continues to make significant advancements in the field of biocommunication, and with ZYTO's subscription model, you can keep up to date with the latest software releases at no additional charge.

Testimonials:

"ZYTO bio-technology creates a better informed patient, and affords greater compliance, better clinical results, and patient satisfaction. This tool leads to greater patient retention, and referral of family, friends, and neighbors while adding yet another revenue center to the practice through scans, and added dispensary."

– Dr. L. N. Meltz

"Patients are extremely excited with their results and anxious to tell their friends and family."

– Dr. J. Schleusner

"ZYTO Technology has saved me time, money and has improved my effectiveness with my patients."

– Dr. B. Shelton
