

WHAT IS A ZYTO SCAN?

ZYTO scans are organized into what are called biosurveys. You've probably filled out a survey before: a series of questions that you provide answers to. A biosurvey is similar to a survey, only you don't answer the "questions" consciously—your body answers them directly.

With ZYTO biocommunication, the "question" is a logarithmic digital signature in the ZYTO software, which we call a Virtual Item. The answer is found by measuring changes in the electrical properties of your skin, which are then analyzed by the ZYTO software.

A biosurvey can be as varied and versatile as any other survey. Some biosurveys are general in nature and include Virtual Items concerned with overall wellness, while others include items relating to specific body areas or systems. There are also biosurveys that deal with environmental factors.

WHY GET ONE?

ZYTO products help you make better decisions about your wellness. That's why ZYTO technology is referred to as wellness decision-support technology. It's important to note that ZYTO scans are not designed or intended to treat or diagnose.

HOW OFTEN SHOULD I BE SCANNED?

Regular ZYTO scanning will provide you with up-to-date biocommunication information as your body changes. Your practitioner will guide you with the specific scan schedule best for you.

IS IT SAFE?

There are no known contraindications for properly administered ZYTO scanning. The amount of energy used in a scan is so low that it is safe for infants, children, and adults of all ages, including people with pacemakers and pregnant women.

The ZYTO Hand Cradle has been cleared by the FDA for the measurement of galvanic skin response. ZYTO software has not undergone FDA review for effectiveness. ZYTO technologies are not intended to be used in the diagnosis, cure, treatment, mitigation, or prevention of any disease or medical condition. The diagnosis and treatment of medical conditions should only be undertaken by qualified medical professionals. ZYTO professional software provides general wellness information and should not be used without the involvement of a licensed healthcare professional. ZYTO products have not been the subject of controlled clinical trials to establish their effectiveness and their use is not a generally accepted medical practice by the traditional medical establishment. If you have any questions regarding ZYTO technology or our products please contact us at info@zyto.com.
